

3.2 Environmental Awareness & Sustainability Policy

QUALITY AREA 3: Physical Environment

Aim:

To provide guidelines to assist Bellinghen Preschool to take an active role in caring for the environment, and promoting and contributing to a sustainable future.

Background:

“One of the most significant responsibilities that [early childhood] professionals have is to support children to retain the sense of awe and wonder that they are born with, to add to that a desire to nurture and protect what is beautiful, and to encourage them to appreciate that there are many possibilities for honouring life and wonders that the world holds” (Stonehouse, A. (2006) NSW Curriculum Framework for Children's Services – refer to Sources).

Current research confirms that experiences in the early years help establish lifelong behaviour and values, and this reinforces the need for sustainability education to be included in early childhood programs. It is important for children to understand their place in the world and the role that they can play in protecting the environment. Children should learn to be environmentally responsible and be empowered to make a difference, and this learning should not wait until the 'formal education' of primary school. Elliot and Davis (refer to Sources) state that “early childhood educators have an active and significant role to play ensuring children experience connections with the natural environment in meaningful ways... which will ultimately promote action for sustainability”.

Environmental education can be defined as learning about the environment and how natural systems function; the interconnectedness of plants, animals, humans and the planet we inhabit. Environmental education promotes the growth of knowledge, skills and values about the environment, often with a focus on science and nature. In an early childhood setting, environmental education is integrated into everyday decisions made as part of the curriculum.

Sustainability can be defined in a broader and more holistic context of education for the environment. The complexities of social, environmental and economic systems are acknowledged, and their implications for sustaining life are considered. The aim of sustainability education is to promote a sense of responsibility, respect, empowerment, active participation, enquiry and a desire for social change (adapted from ECA Environmental Sustainability Policy 2005). The goal of sustainability education is to empower children and adults to think and act in ways that meet their immediate needs without jeopardising the potential of future generations to meet their own needs. Sustainable practice in early childhood settings requires a holistic approach that integrates all aspects of sustainability into service operations.

Environmental sustainability can be defined as the responsible use and management of the planet's resources to ensure that they remain available and uncompromised for future generations to use and enjoy.

Relevant Legislation:

- Education and Care Services National Regulations 2011
- Education and Care Services National Law Act 2010
- Early childhood Code of Ethics

Practices:

The Approved Provider is responsible for:

- Collaborating with the Nominated Supervisor, educators, staff, parents/guardians, children and others at the service to identify environmental sustainability strategies for implementation
- Allocating the necessary resources to implement the identified environmental sustainability strategies at the service
- Ensuring the Nominated Supervisor and all staff are aware of their responsibilities under this Environmental Sustainability Policy
- Ensuring the identified strategies are implemented at the service
- Ensuring parents/guardians are aware of, and have access to the Policy.

The Nominated Supervisor is responsible for:

- Collaborating with the Approved Provider, educators, staff, parents/guardians, children and others at the service to identify environmental sustainability strategies for implementation at the service
- Implementing identified strategies for which they have responsibility at the service
- Ensuring environmental education and practices are incorporated into the curriculum
- Providing families with information about environmentally sustainable practices e.g. through displays, fact sheets and local community resources, and by ensuring that they have access to the Environmental Sustainability Policy
- Making recommendations to the Approved Provider about green and sustainable options for the service, that reflect the guidelines within this policy
- Seeking and applying for grants, where appropriate, to support the implementation of strategies
- Keeping up to date with current research, resources and best practice through newsletters, journals and support agencies such as Environmental Education in Early Childhood (EEEC).

Certified Supervisors, educators and other staff are responsible for:

- Collaborating with the Approved Provider, Nominated Supervisor, fellow educators/staff, parents/guardians, children and others at the service to identify environmental sustainability strategies for implementation at the service
- Implementing identified strategies for which they have responsibility at the service
- Engaging in activities that support the service to become more environmentally sustainable (e.g. recycling)
- Incorporating environmental education and sustainable practices within the curriculum
- Planning opportunities for children to connect with nature and the natural world at the service, including on excursions and at other service events
- Incorporating celebrations of environmental awareness into the program e.g. National Tree Day, National Recycling Week, Clean Up Australia Day and Walk to Work Day
- Keeping up to date with current research, resources and best practice through newsletters, journals and support agencies such as Environmental Education in Early Childhood (EEEC).

Parents/guardians are responsible for:

Collaborating with the Approved Provider, Nominated Supervisor, educators, staff, children and others at the service to identify environmental sustainability strategies for implementation at the service
Following the strategies identified and outlined in this Environmental Sustainability Policy
Encouraging their children to adopt environmentally sustainable practices at both the service and at home.
Volunteers and students, while at the service, are responsible for following this policy and its procedures.

Green purchasing

Purchase local products
Purchase recycled products
Purchase energy and water efficient products
Purchase organic produce
Purchase items with minimal packaging
Purchase chemical-free, green cleaning products
Purchase formaldehyde-free paint

Waste

Minimise waste from one-use, throwaway products (e.g. paper towels, disposable nappies, wet wipes) by changing behaviours and procedures, and using alternative products. The following are some suggestions:

- ~ Replace paper towels with individual cloth towels on a peg located in the staff bathroom
- ~ Install a low energy electric hand dryer in children's bathroom
- ~ Encourage children to bring a rubbish-free lunch/snack in a reusable container.
- ~ Adopt green cleaning practices by using safe and sustainable cleaning products and methods.
- ~ Recycle plastic waste (codes #1–#7), glass, paper, cardboard, foil and metal.
- ~ Investigate composting of food scraps.
- ~ Explore the waste hierarchy of refuse within the educational program i.e. reduce, reuse, repair and recycle.
- ~ Refrain from using food items for children's play experiences (e.g. rice, pasta, jelly etc.) as this is wasteful of both the food items, and the water and energy used in production.

Energy

Turn off computers and/or screens when not in use.
Turn off computers and electrical equipment before leaving the building.
Install and use ceiling fans instead of air conditioning, when appropriate.
Close doors and windows when heating or air conditioning the building where possible, while maintaining adequate ventilation. Strategies must be developed for indoor-outdoor programs to enable this to occur.
Turn off fridges that are not in use during extended holiday periods (ensure no food remains and the fridge is cleaned well beforehand).
Turn lights off when not required.
Upgrade old appliances with energy efficient appliances.

Water

Set limits for water use during play, while acknowledging that water play is important and that children need to use water in order to learn how to conserve it.
Ensure that water from troughs and bowls is reused to water the garden.
Install water saving taps in children's bathrooms.
Install dual flush toilets

Biodiversity

Grow food crops in vegetable gardens.
Plant fruit trees.
Grow a diverse range of plants, and develop children's understanding of how plant diversity encourages animal diversity.
Grow indigenous (native) and water-wise plants.
Water plants in the play space using recycled water where possible. Plants are a precious resource for the planet and should be protected and nurtured.

Transport

Encourage staff to walk, cycle or catch public transport to work and on excursions, where possible.
Create prominent, effective spaces for the storage of bikes and prams to promote riding and walking to staff and families.

Curriculum

Role-model sustainable practices and behaviours.

Actions such as reusing water from a sink and switching off lights when not in use can have a large impact on young children, who are at a formative stage with respect to skills and attitudes.

Aim to counteract the 'throwaway' mentality that children experience everyday in relation to waste. Take every opportunity to talk with young children about sustainable practices, and encourage older children to take part in these practices.

The curriculum offers many opportunities to explore sustainable issues and practices. The following are some suggestions:

Create an 'earth hour' each day where no lights/minimal lighting is used e.g. during rest, relaxation or sleep times.

Use a range of pictures, books and stories that address environmental sustainability issues.

Have waste-free days.

Use improvised, recycled and natural materials for program activities.

Examine damaged household appliances and explore whether they can be repaired.

Play a recycling game to promote an understanding of items that can be recycled.

Investigate alternatives to texta pens and liquid paint, such as powder paint and refillable markers or pencils.

Join Environmental Education in Early Childhood (EEEC) for more ideas.

Family and community involvement

Inform families about this policy and the service's approach to environmental sustainability through information sessions, photo displays and newsletters etc.

Design a poster outlining the key principles of environmental sustainability, for display in the foyer of the service. This may include a charter of principles and key targets to be achieved.

Become involved in community events such as Earth Hour, World Environment Day and Clean Up Australia Day.
